Summary

Information Technology undergraduate with a strong foundation in software development and hands-on experience building full-stack web applications using JavaScript, Python, React.js, Node.js, Flask, and C++. Proficient in designing scalable REST APIs, solving complex problems using efficient algorithms, and delivering clean, responsive user interfaces. Eager to apply problem-solving skills and software engineering fundamentals in high-impact production environments.

Education

Madhuben and Bhanubhai Patel Institute of Technology

Bachelor of Technology in Information Technology

2023 – 2027

CGPA: 9.04 / 10.0

St. Xavier High School, Khambhat

Gujarat Board

Class XII : 68%

Class X : 72%

Technical Skills

Programming Languages: C, C++, JavaScript (ES6+), Python, Java

Frontend Development: React.js, HTML5, CSS3, Bootstrap, Responsive Web Design

Backend Development: Node.js, Express.js, Flask, REST APIs, JWT Authentication

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Browser APIs, Regular Expressions

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, System Design Basics

Projects

InternshipFinder | *Python, Flask, JavaScript, HTML5, CSS3, Requests, Regex*

Sep 2025 – Oct 2025

- Built a full-stack web application that automates scanning of company career pages to surface active Software Engineering internship opportunities in real time.
- Implemented keyword extraction and email parsing using Python regular expressions to identify required skills and HR contact details from unstructured web content.
- Developed a responsive and interactive frontend enabling users to search for companies and view dynamically filtered internship listings.
- Integrated an automated LinkedIn HR search query generator to assist users in recruiter discovery, reducing manual sourcing effort significantly.
- Architected a Flask REST API backend to handle scraping and parsing requests, decoupling frontend and backend logic for improved scalability and maintainability.

Full Battery Alarm Web App | *JavaScript, HTML5, CSS3, Battery Status API*

Mar 2025 – Apr 2025

- Developed a real-time browser-based utility using the HTML5 Battery Status API to monitor device charge levels and trigger audio alerts when the battery reaches full charge.
- Implemented event-driven background audio notifications with a manual stop option, enabling users to step away from their device without missing the full-charge event.
- Designed an intuitive user interface featuring dynamic color indicators and icons to communicate battery status clearly at a glance.
- Delivered a lightweight, zero-dependency solution using vanilla JavaScript, ensuring cross-browser compatibility and fast load times.

Certifications

- Developing Backend Apps with Node.js and Express – HackerRank [🔗](#)
- Object-Oriented Programming (OOP) – Take U Forward (TUF) 2026
- Career Essentials in Generative AI by Microsoft and LinkedIn [🔗](#)
- HTML, CSS, JavaScript – Infosys Springboard
